

## Introduction

With the iVvy - Salesforce integration you can synchronise contacts and email history from iVvy into Salesforce on a daily basis.

This integration allows a two-way sync of contact data and a one way sync of iVvy email logs to Salesforce contacts.

## How it works

## Key features

- Sync contact custom data for a more detailed sync between the two systems.
- No manual data maintenance. Keep your contacts up to date in both systems automatically.
- View your contacts' comprehensive email history in Salesforce from both systems.
- Easily identify your contacts in iVvy that came from Salesforce via a nominated subscription group.

---

Sync up to 5000  
contacts daily
